LUIS FELIPE HENAO

Senior Data Engineer | GCP, BigQuery, Spark and Apache Airflow
Paris, France | felipe@henao.me | henao.me
linkedin.com/in/lf-henao | github.com/felipe-henao

PROFESSIONAL SUMMARY

Senior Data Engineer with 6+ years of experience designing, building and optimizing batch data pipelines and data platforms on Google Cloud Platform. Reduced end-to-end latency by approximately 80% across customer file ingestion, processing and delivery through scalable ETL architectures on Apache Airflow and Cloud Composer. Shortened the publisher approval cycle from four weeks to two days by designing a multi-agent review and validation system. Specialized in reliable orchestration, data quality controls, observability and traceability for critical workloads. Based in Paris; French and English C1, Spanish native.

TECHNICAL SKILLS

Data platforms and processing:	BigQuery, Dataflow, Spark, Cloud Storage, ETL/ELT, batch processing, data modeling.
Orchestration and messaging:	Apache Airflow / Cloud Composer (Certified), Pub/Sub.
Quality and observability:	Data quality checks, pipeline monitoring and observability.
Programming:	Python, SQL, JavaScript.
Cloud and infrastructure:	GCP, AWS, Terraform, Docker, Kubernetes.
Delivery:	CI/CD (Jenkins, Git), code reviews, scalable and secure system design.
AI and automation:	Multi-agent systems, human-in-the-loop validation automation.
Languages:	Spanish (Native), French (C1), English (C1), Italian (Basic).

PROFESSIONAL EXPERIENCE

Senior Data Engineer | LiveRamp, Paris *September 2020 – Present*

- **Pipeline performance:** Cut end-to-end customer file processing and delivery latency by ~80% by redesignin g ETL pipelines on Apache Airflow / Cloud Composer with Dataflow, Spark and Cloud Storage.
- **Data platform:** Design and operate reliable batch pipelines on GCP using BigQuery, Pub/Sub, Cloud Storag e and Cloud Composer for ingestion, transformation and delivery.
- **Quality and observability:** Add data quality checks and pipeline monitoring to improve reliability of critical customer delivery paths.
- **Data Ethics automation:** Built a multi-agent application that automates publisher reviews, shortening the approval cycle from four weeks to two days.
- **Engineering practice:** Own key technical decisions and lead code reviews; deliver HA, security-conscious data services with product and business stakeholders.

Web Developer | Blorgania, Gennevilliers *July 2020*

- Fixed an unreported mobile checkout bug that blocked purchases; enabled mobile orders and increased sale s.

Multi-role Experience (Technology and Operations) | Paris *2012 – 2019*

- **Technical support (UEFA EURO 2016):** Supported critical network infrastructure for the international press.
- **Operations:** Led teams and resolved complex incidents under pressure in high-reliability environments.

EDUCATION

Application Designer and Developer (Bac+3) | Simplon, Paris, France *2020 – 2021*

Computer Engineering (Bac+3) | Universidad Autónoma de Occidente, Colombia *2004 – 2008*

Sports Management (Bac+2) | Université de Lyon / INSEP, France *2014 – 2016*

CERTIFICATIONS

- Google Cloud Professional Cloud Architect — Google Cloud Platform
- DAG Authoring for Apache Airflow 2 — Astronomer
